RACKSPACE®
CLOUD SITES™

Quickly host scalable and reliable websites

Cloud Sites™ is a fully managed platform-as-a-service (PAAS) for developers and designers to host websites and blogs. Simply choose your environment and do what you love to do — coding and designing — and we will take care of the rest.

We manage the infrastructure so you don't have to deal with unexpected traffic spikes or reliability concerns of your website. Whether you work in PHP or .NET, Cloud Sites supports your CMS i.e. Wordpress, Joomla, Drupal etc..

Getting Started

Step One: **Upload Your Site to the Reliable Cloud**
You can create a new Rackspace® Cloud powered site in minutes. Load balancing, clustering, firewall and DNS are all inherited by your application automatically. Combine this with our world-class data centers and our renowned Fanatical Support®, and you have a reliable platform for your website.

Step Two: **Watch It Scale**
Right from the second you upload your websites to Rackspace Cloud Sites, your sites are hosted on advanced clustered technology designed for high-performance and scale.

"The finest hosting provider I've ever used; an absolute pleasure to be hosted by. Your support is fantastic and the service is top notch! Thank you Rackspace for making my life that little bit easier!"

Chad Parker,
Cybernautic

2. RELIABILITY

Avg Uptime: **99.9%**

"Reliability was one of the primary reasons we chose Rackspace. We previously had our sites on a number of different VPS setups, all of which suffered from pretty poor reliability. With Rackspace, for the first time in years I have been able to take a holiday without having to worry that one of our sites would go down and stay down."

Andrew Bateman,
Technical Director, Future Büro

3. SCALABILITY

Web Requests/Year**: 500+ Billion**
Sites: **400+ Thousand**
WordPress/Joomla/
Drupal sites: **100+ Thousand**
Files: **1+ Billion**

"With Rackspace Cloud Sites, we delivered 11.6 million update requests over the course of an hour and 45 minutes."
